Reference: Anson Gas Producers Permission to Survey

Anson Gas Producers, LLC (ACGP) is developing and constructing a renewable natural gas project at the Anson Landfill. A summary of the project is attached. You can also visit us at <http://AnsonRNG.com>

ACGP is investigating potential pipeline routes to pipe the processed renewable natural gas from the landfill to Piedmont Natural Gas' pipeline approximately 5 miles from the landfill. ACGP is requesting permission to survey your property to assist in the evaluation of feasible pipeline routes.

Please sign and send this letter back to ACGP in the enclosed self-addressed envelope. Your execution of this permission to survey is greatly appreciated. Please contact Nathan Plagens at (713) 516-1507 or nathan.plagens@hotmail.com with any questions.

Anson Gas Producers, LLC (ACGP) Renewable Natural Gas (RNG) Project

- ACGP is developing and constructing a Renewable Natural Gas (RNG) facility at the Anson Landfill.
- This project has major positive environmental and community impacts associated with the collection and utilization of the gas being generated from this landfill.
- The primary constituent in landfill gas is Methane (just like in Natural Gas) and our facility will process that landfill gas into pipeline quality RNG that can be used in homes, industry, and transportation.
- The processed gas is enough to heat an average 13,000* homes and reduce landfill gas emission an average 22 tons* of methane annually.
- Construction will begin in 2022 and end in 2023. Up to 100 workers per day will be employed during construction and support 150 new jobs in the area during construction.
- Normal operations will employ 4 highly skilled operators and support 6 new permanent jobs in the area.
- The renewable gas is planned to be piped from the landfill to a Piedmont gas pipeline 5-6 miles away.
